Personal Profile

Experienced Android Developer with a proven track record of designing, developing, and optimizing robust mobile applications. Skilled in building scalable and high-performance Android apps using Java and Kotlin. Proficient in implementing modern design patterns and best practices to deliver user-friendly and efficient solutions. Committed to staying updated with the latest trends and technologies in the Android development ecosystem.

Skills

Programming	Java, Kotlin, XML.
Framework/Libraries	Retrofit, Glide, MVVM, SSL Pinning, Gradle, Proguard, RoomDb, Kotlin Coroutines.
Tools	Android Studio, Git.
Soft Skills	Time Management, Teamwork, Problem-solving, Documentation.

Work Experience

WheelsEye Technologies *Gurgaon, India*

Software Engineer *Nov 2024 - Present*

- Developing Android apps to enable seamless IoT integration in logistics vehicles with real-time BLE communication.

Razorpay Software Private Limited *Bangalore, India*

Software Engineer *Aug 2021 - Sep 2024*

- Developing Android SDK for enabling UPI payments on Merchant App.

MountBlue Technologies *Bangalore, India*

Software Engineer *Feb 2020 - July 2021*

- Received Training on Android Development.
- Worked on multiple projects as an evaluation for the training.
- Deployed on Razorpay Software Pvt Ltd for a 1-year contract, leading the UPI SDK project.

Projects

Installer App *Gurgaon, India*

WheelsEye Technology

- Developed and launched an Android Installer App to guide technicians through stepwise IoT device installations in end-user vehicles, enhancing field operations and setup accuracy.
- Led development of BLE-based communication modules to securely connect, configure, and update various IoT devices such as fuel sensors and GPS trackers.
- Implemented in-app logging and metric tracking to aid in real-time debugging and post-installation analysis, significantly reducing field errors.
- Introduced security features like password updates for IoT devices, ensuring enhanced protection against unauthorized access.

Turbo P2M *Bangalore, India*

Razorpay Software Private Limited

- Developed and launched Turbo P2M, an Android SDK using Kotlin, enabling UPI Payment on the merchant app, enhancing in-app payment experience.
- Led the entire project lifecycle from conceptualization to deployment, building the app from scratch.
- Added advanced features, such as Credit Card on UPI and Prefetch feature, increasing merchant conversion rates and improving the SDK's overall functionality.
- Enhanced analytics to provide the Analytics team with comprehensive insights into SDK performance, enabling better decision-making and optimization.
- Implemented robust security measures, including the integration of security layers, to ensure secure transactions.
- Successfully onboarded and converted numerous merchants onto the SDK, expanding the app's reach and adoption.

UPI Direct Pipe Switch *Bangalore, India*

Razorpay Software Private Limited

- Led the UPI Direct Pipe Switch project using Kotlin, overseeing direct communication with NPCI for all payment features, including PSP or P2M SDK integration.
- Successfully launched the UPI Direct Pipe Switch project, laying the foundation for future integration of SDK-based services and expanding the organization's payment capabilities.

UPI IN A BOX (PSP) *Bangalore, India*

Razorpay Software Private Limited

- Spearheaded the development of UPI IN A BOX, a TPAP SDK using Kotlin and Java, offering fully integrated PSP features for merchants.
- Tailored the SDK for key clients, including Bajaj, by closely collaborating to address their specific business requirements, leading to a customized and robust payment solution.
- Improved SDK initialization time from 11 seconds to 7 seconds, resulting in an increase in user onboarding success rate from 72% to 85%.
- Added a security layer by integrating root detection and SSL pinning, providing additional protection for sensitive transactions and data.
- Optimized performance by refactoring critical code paths, reducing transaction processing time by 30%.
- Collaborated with merchants to integrate the SDK, providing support for debugging and resolving production issues, ensuring smooth operations.
- Mentored and onboarded 4 junior developers, guiding them in project integration and upskilling them in Kotlin and Java for future SDK enhancements.
- Implemented advanced features and functionalities to provide a comprehensive payment solution for merchants..

CryptoCompare Clone App *Bangalore, India*

MountBlue Technologies

- Developed a CryptoCompare clone app during the training phase, primarily for educational purposes.
- Recreated the core features of the original CryptoCompare application to deepen understanding of cryptocurrency data aggregation and analysis..

Movie App *Bangalore, India*

MountBlue Technologies

- Designed and developed a Movie Explorer app during the training phase, focusing on enhancing skills in Android app development and API integration.
- Engineered the app with the primary goal of providing users with an immersive experience to explore and discover movies across various categories.

Education

Punjab Technical University *Malout, India*
